Environmental Geography

# Contents

- 1. Environmental Geography** **1 – 9**  
Definition of Environmental Geography; Scope of Environmental Geography; Geography and Ecology; Environmental Geography and Related Sciences; Fundamental Concepts in Environmental Geography.
- 2. Environment** **10 – 17**  
Meaning of Environment; Environmental factors; Types of Environment; Environmental Perception; Levels of Environmental Perception; Environment and Society; Environment and Resources; Man and Nature.
- 3. Man-Environment Relationships** **18 – 28**  
Approaches to the Study; Environmentalism or Determinism, Teleological approach, Possibilistic approach, Neo deterministic approach, Ecological approach, System approach; Man's Interaction with Environment : a Historical Perspective—Period of Hunting and Food gathering; Period of Animal Domestication and Pastoralism; Period of Plant Domestication and Agriculture; Period of Science, Technology and Industrialization.
- 4. Ecology** **29 – 36**  
Meaning and Definitions; Scope of Ecology; Historical Development of Ecology; Approaches to Ecology : Its Main Sub-divisions; Specialized Fields of Ecology; Basic Concepts of Ecology; Ecology in India, Relevance of Ecology.
- 5. Eco System** **37 – 62**  
Meaning and Definition; Kinds of Ecosystem; Structure (Components) of Ecosystem— Ecological Pyramids; Functioning of an Ecosystem; Productivity of an Ecosystem; Food Chains in Ecosystems; Food webs; Energy Flow in an Ecosystem; Bio-geo-chemical cycling (Nutrient cycles in Ecosystems)—Hydrological cycle, Carbon cycle, Oxygen cycle, Nitrogen cycle, Phosphorus cycle, Sulphur cycle; Stability of Ecosystem; Major Ecosystems—Pond Ecosystem, Marine Ecosystem, Grassland Ecosystem, Forest Ecosystem, Desert Ecosystem, Cropland Ecosystems; Major Ecosystems of India— Himalayan or Mountain Ecosystem, Plain Ecosystem, Hot Desert Ecosystem, Plateau Ecosystem, Coastal Ecosystem, Plain-Plateau Transitional Ecosystem, Island Ecosystem.
- 6. Biosphere** **63 – 72**  
Meaning and Definition; Evolution of the Biosphere; Biosphere as a system; Biosphere as an Ecosystem; Components of Biosphere : Abiotic Components—Lithosphere, Atmosphere, Hydrosphere, Biotic Components—Plants, Animals, Micro-organisms.

- 7. Soil System** **73 – 88**  
Meaning and Definition; Components of Soil; Formation of Soil-Factors Affecting Soil Formation; Processes in Soil Formation; Soil Profile; Soil Characteristics—Soil Texture, Soil Structure; Soil Classification; Land use, Problems Associated with Agriculture, Measure to Prevent Excessive Soil Erosion; Measures to Restore and Maintain Soil Fertility; Future Management of Soil Resources.
- 8. Plant Kingdom** **89 – 102**  
Classification of Plants— Morphological classification, Classification of Plants Based on Life Forms; Evolution of Plants; Origin of Species; Origin of Earth’s plant cover; Dispersal of Plants, Role of Man in Plant Dispersal; Distribution of Plants—Distribution of Terrestrial Plants, Distribution of Aquatic Plants; Floristic (Botanical) Regions of India.
- 9. Animal Kingdom** **103 – 116**  
Classification of Animals; Origin and Evolution of Animals; Dispersal of Animals— Factors of Dispersal; Extinction of Species; Distribution of Animals—Factors Affecting Distribution of Animals; World Distribution of Animals.
- 10. Biomes** **117 – 141**  
Meaning and Definition; Major Biomes of the World—Tundra Biome; Temperate Coniferous Forest (Taiga) Biome; Temperate Grassland Biome; Mediterranean Biome; Savanna Biome; Tropical Evergreen Rainforest Biome; Monsoon Deciduous Forest Biome; Desert Biome.
- 11. Bio-Diversity** **142 – 178**  
Meaning and Definition; Keystone Species; Distribution of Bio-diversity; India as a Mega-Diversity Nation; Extinction of Species—Causes of Extinction of Species; Threatened Species; Bio-diversity Hotspot; Hotspots of Indian Bio-diversity; Eco-regions of Threatened Bio-diversity, Critically Endangered Species of Animals, Critically Endangered Species of Plants; Conservation of Bio-Diversity; Status of Bio-diversity Conservation in India; Present Scenario of Bio-diversity Conservation in India; Management of Biological Resources—Off-Site Management of Plants, Off-Site Management of Animals; On-Site Management of Plants and Animals; Protected Lands; International Agreements to Conserve Bio-diversity.
- 12. Global Warming and Climate Change** **179 – 208**  
Greenhouse effect : Greenhouse Gases; Evidences of Global Warming; Repercussions for temperature, rainfall, sea level and disaster risk; Impact of Climate Change on small island developing states; Impact of Climate Change on Human Development : Agricultural Production and Food Security; Water Scarcity, Glaciers in Retreat, Exposures to extreme weather risks, Floods and Tropical Storms, Ecosystems and Bio-diversity, The Arche under treat; The Coral Reef under threat ; Human Health and extreme weather events; Major Events on Debate on Climate Change; The Debate on Climate Change : Pre Rio Scenario; Rio : The Earth Summit; Kyoto Protocol; World

Summit on Sustainable Development; Post Sydney Scenario; Bali Action Plan; Climate Talks in Poznan, Pre-Copenhagen; Post-Copenhagen Scenario, Cancun Agreement; El Nino and La Nina; Effects of El Nino and La Nina; Recent Occurrences; ENSO and Global Warming; El Nino Modoki; Health and Social Impacts of El Nino; History and Pre-historic Information; the Link between Climate Change and El Nino.

**13. Natural Hazards and Disasters Management 209– 251**

Types of Natural Hazards, Geological Hazards—Earthquakes—Causes, Distribution, Effects; Tsunamis : Characteristics, Causes; Chronology, Sumatra Tsunami (2004), Japan Tsunami (2011) Volcanic Hazards—Distribution, Some Famous Eruptions, Environmental Impact of Volcanic Eruptions; Landslides and Mass Movements; Landslides Prone Areas; Subsidence and Collapse; Coastal Processes; Meteorological Hazards—Tropical cyclones—Cyclones, Hurricanes, Typhoons, Tornadoes, Severe Storms, Thunder Storms; Cloud bursts and Flash Floods; Temperature Extremes; Hydrological Hazards; Floods Causes, Flood Control Measures; Droughts and Famines; Impact of Droughts, Types of Drought, Some Case Studies, Drought Control Measures; Famines; Man Induced Hazards/Disasters; Physical Hazards, Chemical and Nuclear Hazards; Regional Pattern of Disasters; Indian Scenario; Impact of Disasters; Disaster Management : Components of Disaster Reduction; Risk Management, Stages of Disaster Reduction and Management; Disaster Management in India : Institutional Organization and Policy of Disaster Management; National Policy on Disaster Management; Disaster Management Strategies : Earthquake Risk Mitigation; Cyclone Disaster Management; Landslide Disaster Management; Tsunami Disaster Management; Flood and Drought Disaster Management..

**14. Environmental Pollution 252 – 305**

Definition and Meaning of Pollution; Pollutants, Kinds of Pollution; Air Pollution—Meaning and Definition; Sources of Air Pollution; Specific Phenomena Related with Air Pollution; Global Warming; Acid Rains; Ozone Depletion; Photochemical Smog; Factors Affecting Air Pollution Levels, Effects of Air Pollution, Measures for Controlling Air Pollution; Water Pollution—Physical and Chemical Properties of Water, Classification of Water, Uses of Water, Water Consumption Patterns in the World; Water Quality, Sources of Water Pollution, Surface Water Pollution; Ganga River Pollution; Ganga Action Plan; Yamuna River Pollution : Other Polluted Rivers of India, Lake Pollution, Ground Water Pollution, Extent of Pollution, Impact on Health; Marine Pollution; Effects of Water Pollution—Effects on Man, Effects on Animals/Aquatic Life, Other Effects, Prevention and Control of Water Pollution; Global Scenario of Water Pollution Control; Management of Water Resources : Global Scenario; Problems Surrounding the Use of Water Worldwide, Management of Groundwater Resources, Management of Surface Water Resources, Management of Marine Water Resources; Water Resource Management in India, Water Quality Management in India, Rural Water Supply; Future Outlook; Land Pollution/Solid Waste Pollution—Sources of Land Pollution—Domestic Wastes, Industrial and Mining Wastes, Agricultural Wastes, Radioactive Wastes; Biological Agents, Harmful Effects of Land and Soil Pollution; Control

of Land and Soil Pollution; Solutions to Waste Generation Problems; Solid Waste Management; New Technologies of Waste Disposal Under Trial; Radioactive Pollution—Kinds of Radiation, Sources of Radiation Exposure, Nuclear Power, Nuclear Explosions, Radioactive Wastes from Nuclear Power Plants, Biological Effects of Radiations; Noise Pollution—Measurement of Sound/Noise and its Intensity; Sources of Noise Pollution, Effects of Noise Pollution, Control of Noise Pollution.

**15. Environmental Degradation 306 – 326**

Meaning and Nature of Environmental Degradation; Causes of Environmental Degradation—Deforestation; Impact of Deforestation on Environment, Conservation Measures; Soil Erosion and Sedimentation—Adverse Effects of Accelerated Soil Erosion, River Valley Projects, Agricultural Development; Mining, Urbanization—Impact of Urbanization on Climate; Industrialization, Technological Development, Tourism.

**16. Population Dynamics and Ecological Crisis 327 – 344**

Population Growth and Distribution; Components of Population Change; Urbanization; Population Growth and Economic Development; Demographic Transition, Carrying Capacity of Environment; Ecological Checks on Growth of Population; Food Supply, Food Security; Food Crisis; Hunger; Malnutrition; Relationship Between Hunger and Poverty; Strategies for Expanding Global Supply; Urban Ecology-Indian Scenario.

**17. Conservation of Natural Resources 345 – 385**

The Problem of Conservation; Concept of Resource Conservation; Aims of Conservation; Nature Exploitation and Nature Conservation; Planning for Conservation of Natural Resources; Conservation of Important Natural Resources—Soil Conservation, Techniques of Soil Conservation; Conservation of Forests—Techniques of Forest Conservation; Conservation of Water Resources; Techniques of Water Conservation; Conservation of Mineral Resources, Techniques of Conservation of Mineral Resources; Conservation of Fisheries, Conservation and Management of Range Lands, Conservation of Wet Lands.

**18. Global Environmental Issues 386 – 411**

Depletion of Ozone Layer—Ecological Significance of Ozone, Protection of Ozone Layer, Developing Alternatives. Greenhouse Effect : Global Warming—Contributors to Greenhouse Effect, Impact of Greenhouse Effect on Climate, International Efforts to Meet the Challenge; Acid Rains; Desertification; Deforestation; Conservation of Bio-diversity, International Efforts for Preserving Bio-diversity; Hazardous Waste Trade; Pollution of Oceans; Mountaineering and Trekking; Environmental Problems Associated with the Use of Nuclear Resources.

**19. Environmental Challenges in India 412 – 436**

Land Degradation; Deforestation; Mining; Water Pollution; Urbanization; Bio Dams Controversy; Silent Valley : An Abandoned Project; Hazardous Waste Trade

Management; Conservation of Bio-diversity; Indira Gandhi Canal Project; Chilika Lake Controversy; Eutrophication of Wetlands.

**20. Resources and Environment 437 – 451**

Resources : Meaning and Concept; Perception of Resource Availability; Classification of Resources; Owen’s Classification, Dassman’s Classification, General Classification, Ecological Resources : Classification of Ecological Resources; Resource Use and Environment; Processes of Environmental Degradation; Global Environmental Problems : Global Warming; Acid Rains; Ozone Depletion; Deforestation; Desertification; Soil Erosion and Depletion; Loss of Biodiversity; Water Scarcity and Pollution; Marine Pollution; Radioactive Pollution; Land Pollution.

**21. Environmental Planning and Management 452 – 484**

Concept of Environmental Planning and Management; Environmental Planning; Environmental Approach to Planning; Strategies for Environmental Planning; Ecological Approach in Planning; Principles of Environmental Planning; Environmental Management—Meaning and Definition; Approaches to Environmental Management—The Preservative Approach, The Conservative Approach; Principles of Environmental Management; Resource Management—Resource Appraisal; Resource Evaluation; Resource Management and Conservation; Perception and Choices; Management of Ecological Resources—Survey of Ecological Resources, Evaluation of Ecological Resources; Preservation and Conservation of Ecological Resources; Biosphere Reserves; Wild Life Management in India—Government Organizations, Non-Government Organizations; Protected Areas Network; Special Projects for Endangered Species; Environmental Impact Assessment—Methodologies for Environmental Impact Assessment; Evaluation of Environmental Impact of Proposed Action Plan; Case Studies in Environmental Impact Assessment—Tehri Dam, Sardar Sarovar Project; Environmental Education—Guiding Principles; Environmental Education Programmes; Environmental Education in India; Formal Environmental Education, Non-Formal Environmental Education; Environmental Information; Environmental Organizations and Agencies; International Bodies.

**22. Sustainable Development 485 – 497**

Meaning of Development; Eco-Development; Concept of Sustainability; Basic Aspects of Sustainability, India’s Approach to Environment and Development.

**Bibliography 498 – 500**

## List of Figures

- Fig. 1.1 : Links between environmental geography and related sciences
- Fig. 2.1 : Inter-relations between principal components of the environment
- Fig. 4.1 : Specialized fields of ecology
- Fig. 5.1 : A generalized scheme of nutritional relationships among different biotic components of an ecosystem
- Fig. 5.2 : Kinds of ecosystem
- Fig. 5.3 : A generalized model of an ecosystem to show its structure and functions
- Fig. 5.4 : Pyramid of numbers in a grassland/pond/forest/parasitic ecosystem
- Fig. 5.5 : Pyramid of biomass in a grassland/forest/pond
- Fig. 5.6 : Pyramids of energy
- Fig. 5.7 : Average annual production rate of various ecosystems
- Fig. 5.8 : A detritus food chain based on mangroves leaves falling into shallow estuary waters
- Fig. 5.9 : A food web in a grassland ecosystem with five possible food chains interlocked together
- Fig. 5.10 : Food web in a pond
- Fig. 5.11 : Energy flow in a lake (fresh water ecosystem)
- Fig. 5.12 : Hydrological Cycle
- Fig. 5.13 : Carbon Cycle
- Fig. 5.14 : Oxygen Cycle
- Fig. 5.15 : Nitrogen Cycle
- Fig. 5.16 : Phosphorous Cycle
- Fig. 5.17 : Sulphur Cycle
- Fig. 6.1 : Extent of biosphere
- Fig. 6.2 : Vertical extent of biosphere
- Fig. 6.3 : Factors affecting the biosphere
- Fig. 6.4 : Zones of the ocean
- Fig. 7.1 : Generalized soil profiles
- Fig. 7.2 : Soil profiles in different ecosystems
- Fig. 7.3 : Arbitrary textural classification of soils
- Fig. 7.4 : Distribution of world soils by types
- Fig. 8.1 : Plant dispersal through continents
- Fig. 8.2 : Major floral realms
- Fig. 9.1 : Centres of origin and dispersal routes of mesosaurs, glossopteris, lystrosaurs and cynognathus
- Fig. 9.2 : Dispersal of animals and plants at global scale
- Fig. 9.3 : Centres of evolution and dispersal routes of fresh water fishes and land invertebrate animals since mesozoic era
- Fig. 9.4 : Dispersal of giant African snails by man between 1760 and 1945
- Fig. 9.5 : Aggregations and swarming of locusts
- Fig. 9.6 : Zoo-geographical regions of the world
- Fig. 10.1 : Major biomes of the world
- Fig. 10.2 : Coniferous (Taiga) biome
- Fig. 10.3 : Temperate grassland biome
- Fig. 10.4 : Mediterranean biome
- Fig. 10.5 : Tropical Savanna biome
- Fig. 10.6 : Tropical evergreen forest biome
- Fig. 10.7 : Vertical stratification of tropical evergreen rainforests
- Fig. 10.8 : Monsoon Deciduous Forest Biome
- Fig. 10.9 : Tropical desert biome
- Fig. 11.1 : Global bio-diversity
- Fig. 11.2 : Centres of plant diversity, gene banks, genetic origins of crops and livestock

- Fig. 11.3 : Hot spots of high endemism and significant threat of imminent extinctions
- Fig. 11.4 : Protected lands worldwide
- Fig. 11.5 : Global wildlife trade
- Fig. 12.1 : Greenhouse effect
- Fig. 12.2 : Sources of greenhouses gas growth
- Fig. 12.3 : Rising temperatures and reduced rainfall
- Fig. 12.4 : El Nino and La Nina conditions
- Fig. 13.1 : World distribution of earthquake
- Fig. 13.2 : Earthquake zones of India
- Fig. 13.3 : Worst affected areas of 2004 tsunami
- Fig. 13.4 : World distribution of Volcanoes
- Fig. 13.5 : Areas and tracks of tropical cyclones
- Fig. 13.6 : Flood prone areas in India
- Fig. 13.7 : Drought prone areas in India
- Fig. 14.1 : Air pollutants and sources
- Fig. 14.2 : Areas of acid rains
- Fig. 14.3 : Worldwide water availability
- Fig. 14.4 : Availability of safe drinking water in the World
- Fig. 14.5 : The shrinking Aral Sea
- Fig. 14.6 : Marine pollution due to oil spills
- Fig. 14.7 : Drawdown and cone of depression in a pumped well
- Fig. 15.1 : Soil erosion due to deforestation and overgrazing
- Fig. 15.2 : Pesticide impact cycle
- Fig. 15.3 : Pollution dome and pollution plume
- Fig. 16.1 : Population and ecological crisis
- Fig. 16.2 : World population increase between 8000 B.C. and 2000 A.D.
- Fig. 16.3 : World population growth rates
- Fig. 16.4 : The Population dominance of the Northern Hemisphere
- Fig. 16.5 : Demographic transition
- Fig. 16.6 : Distribution of per capita calorie consumption in the world
- Fig. 16.7 : Urban ecology
- Fig. 18.1 : The thinning of stratospheric ozone
- Fig. 18.2 : Acid precipitation and point of origin of its precursors worldwide
- Fig. 18.3 : Deserts and areas of desertification
- Fig. 18.4 : Area of closed forests cleared annually in selected tropical countries
- Fig. 18.5 : Deforestation in tropical rainforests
- Fig. 18.6 : Change in forest area
- Fig. 18.7 : Major oil slicks
- Fig. 18.8 : Spread of radioactive cloud
- Fig. 18.9 : Plume behaviour produced by chernobyl fallout
- Fig. 19.1 : The hotspots of air pollution in India
- Fig. 19.2 : Issues connected with big dams
- Fig. 19.3 : Indira Gandhi Canal Project
- Fig. 19.4 : Physiography of Chilika Lake
- Fig. 21.1 : Schematic zonation of a biosphere reserve
- Fig. 21.2 : An example of clustre biosphere reserve with multiple functions (After-Batisse, 1986)
- Fig. 21.3 : Schematic presentation of functions of a cluster biosphere reserve
- Fig. 21.4 : Tehri Dam Project
- Fig. 21.5 : Sardar Sarovar Project
- Fig. 22.1 : Impact of development on environment.
